Aruthenganvilai, Kallukatti Junction, Azhikal Post, Kanyakumari District - 629 202

DEPARTMENT OF COMPUTER SCIENCE AND ENGINEERING

Vision of the Department

To be a leading department in computer science education and innovation, equipping students with the expertise to create and solve real-world challenges through ethical, responsible, and transformative technological solutions for global progress

Mission of the Department

M1 To provide a strong foundation in computer science principles, fostering innovative problem-solving and a deep-rooted commitment to developing socially responsible and impactful engineering solutions

M2 To bridge academia and industry by fostering partnerships and research that equips students with practical skills and entrepreneurial drive.

M3 To inspire intellectual curiosity and ethical responsibility, guiding students to apply technology for the advancement of humanity.

Program Education Objectives

PEO1 Apply their technical competence in computer science to solve real world problems, with technical and people leadership.

PEO2 Conduct cutting edge research and develop solutions on problems of social relevance.

PEO3 Work in a business environment, exhibiting team skills, work ethics, adaptability and lifelong learning.

VALUE ADDED COURSE

ODD 2023-2024

COURSE CODE/ COURSE NAME: VAC 28-Building And Deploying Flutter Web Apps
RESOURCE PERSON: Mrs. G Santhiya , Ms. R Shirley Jeeva Malar
CLASS:S3/II CSE A, B

COURSE DESCRIPTION:

Building and Deploying Flutter Web Apps involves using Flutter, a popular UI toolkit, to create web applications that run on various browsers using a single codebase. Developers can write Dart code that seamlessly integrates with the web platform, offering a rich user experience. The process begins with setting up the development environment and configuring Flutter for web support. Flutter's responsive design capabilities help create applications that adapt to different screen sizes and devices. Performance optimization, including lazy loading and reducing the build size, is essential for fast web apps. Testing and debugging are critical steps to ensure functionality across browsers. Once the app is ready, it can be compiled into production-ready code. Deployment options include platforms like Firebase Hosting, Netlify, and GitHub Pages. Flutter's support for Progressive Web Apps (PWAs) enhances the app's usability. Developers can automate deployment through CI/CD pipelines. The result is a high-performance, scalable Flutter web app ready for the market.

COURSE OUTCOME:

After completing this course, students will be able to:

CO1 Proficiency in Flutter for Web Development

CO2 Mastery of Dart Programming and Flutter Widgets

CO3 Ability to Create Responsive and Scalable Web UIs

CO4 Competence in State Management for Flutter Web Applications

CO5 Proficiency in Integrating Web APIs and Handling Backend Communication

VALUE ADDED COURSE

ODD 2023-2024

COURSE CODE/ COURSE NAME: VAC 29 MERN Stack Development

RESOURCE PERSON: Dr. M. Supriya

CLASS:S5/III CSE

COURSE DESCRIPTION:

MERN Stack Development refers to the combination of four powerful technologies: MongoDB, Express.js, React.js, and Node.js. MongoDB is a NoSQL database used for storing data in a flexible, JSON-like format. Express.js is a web application framework for Node.js, simplifying the creation of APIs and handling routing. React.js is a popular front-end JavaScript library for building dynamic, responsive user interfaces. Node.js is a server-side JavaScript runtime that enables building scalable web applications. The MERN stack enables full-stack development, allowing developers to use JavaScript for both client-side and server-side coding. It is known for its high performance, scalability, and ease of use. With MERN, developers can build robust, data-driven applications with real-time capabilities. The stack is highly customizable and supports the development of single-page applications (SPAs) and RESTful APIs. The integration of these technologies allows seamless data flow from the front-end to the back-end, making it a popular choice for modern web development.

COURSE OUTCOME:

After completing this course, students will be able to:

CO1: Understanding of Web Development and MERN Stack Components

CO2: Proficiency in Back-End Development with Node.js and Express

CO3: Mastery of Database Integration with MongoDB

CO4: Front-End Development with React

CO5: Full-Stack Development and Deployment of MERN Applications

VALUE ADDED COURSE

ODD 2023-2024

COURSE NAME: Overview of Devops tools and technologies

RESOURCE PERSON: Mr.C.Senthil Kumar

CLASS:S7/IV CSE

COURSE DESCRIPTION:

DevOps tools and technologies are essential for automating and streamlining the software development lifecycle. These tools facilitate collaboration between development and operations teams, enabling continuous integration, continuous delivery, and infrastructure automation. Popular version control tools like Git and platforms such as GitHub or GitLab help manage source code and track changes. Continuous Integration (CI) tools like Jenkins automate the building and testing of code, ensuring faster releases. Configuration management tools like Ansible, Puppet, and Chef automate infrastructure provisioning and configuration. Docker and Kubernetes enable containerization and orchestration for scalable application deployment. Infrastructure as Code (IaC) tools, including Terraform, help provision cloud resources and infrastructure efficiently. Monitoring tools like Prometheus, Grafana, and ELK Stack provide insights into system performance, while collaboration tools like Slack and Jira enhance team communication. With these technologies, DevOps ensures faster, reliable, and secure software delivery.

COURSE OUTCOME:

After completing this course, students will be able to:

CO1 Understand the core principles and practices of DevOps

CO2 Master Version Control and Continuous Integration (CI) tools

CO3 Implement Continuous Delivery (CD) and automation using relevant tools

CO4 Apply Infrastructure as Code (IaC) principles for cloud environments

CO5 Utilize monitoring, logging, and collaboration tools to ensure efficient DevOps operations

COURSE CODE/ COURSE NAME: VAC 30-Power BI

RESOURCE PERSON: Mrs. Mary Nathusiya.B , Mr. M. RajeshKumar

CLASS:S4/II CSE A, B

COURSE DESCRIPTION:

Power BI is a business analytics tool developed by Microsoft that enables users to visualize and share insights from their data. It provides a comprehensive set of tools for transforming, analyzing, and visualizing data through interactive dashboards and reports. Power BI integrates seamlessly with various data sources, including Excel, SQL Server, and cloud services like Azure. Users can create real-time dashboards, perform data analysis with built-in AI capabilities, and collaborate on reports. It offers both cloud-based and on-premises solutions, catering to businesses of all sizes. Power BI's intuitive interface and powerful features make it a popular choice for data-driven decision-making.

COURSE OUTCOME:

CO1: Proficiency in Data Import and Transformation Using Power Query

CO2: Mastery of Data Modeling and Relationships in Power BI

CO3: Expertise in Using DAX for Data Analytics

CO4: Ability to Design Interactive and Effective Data Visualizations

CO5: Competence in Report Publishing and Sharing in Power BI Service

COURSE CODE/ COURSE NAME: VAC 31 BIG DATA TOOLS

RESOURCE PERSON: Mrs. G. Sutherlin Subitha

CLASS:S5/III CSE

COURSE DESCRIPTION:

Big Data tools are software applications and technologies designed to process, analyze, and visualize vast amounts of data, often from various sources. These tools help organizations manage and derive valuable insights from data that is too large or complex for traditional data-processing methods. Popular Big Data tools include Hadoop, an open-source framework for distributed storage and processing; Apache Spark, which is used for fast, in-memory data processing; and NoSQL databases like MongoDB and Cassandra, which are designed for unstructured or semi-structured data. Hive and Pig provide SQL-like interfaces for data analysis on Hadoop. Apache Flink and Kafka enable real-time data streaming and processing. These tools allow businesses to manage large-scale data sets and perform advanced analytics, helping organizations make data-driven decisions. With the growing demand for data analytics, these tools are integral to handling Big Data in various industries.

COURSE OUTCOME:

After completing this course, students will be able to:

CO1: Understanding the Basics and Characteristics of Big Data

CO2: Proficiency in NoSQL Databases and MongoDB

CO3: Mastery of Hadoop Ecosystem and Resource Management

CO4: Expertise in Data Processing with MapReduce, HIVE, and Pig

CO5: Competence in Advanced Data Processing and Querying Techniques

CERTIFICATION COURSE

UST GLOBAL, TIRUVANDRUM

COURSE CODE/ COURSE NAME: WEB DEVELOPMENT

RESOURCE PERSON: UST Global

CLASS:II CSE

COURSE DESCRIPTION:

Web development is the process of creating and maintaining websites and web applications. It involves a combination of coding, design, and content management to build functional, user-friendly websites. Front-end development focuses on the visual and interactive aspects of a site using technologies like HTML, CSS, and JavaScript. Back-end development handles server-side logic, databases, and application functionality. Web developers also ensure responsive design, accessibility, and performance optimization. Tools like Bootstrap and frameworks like React.js are commonly used to streamline development. Understanding media integration, navigation, forms, and APIs is essential for dynamic web applications. Web development also emphasizes usability, SEO, and security best practices. Developers must stay updated with evolving technologies and frameworks. Ultimately, web development allows businesses and individuals to establish an online presence, connecting with users worldwide.

COURSE OUTCOME:

After completing this course, students will be able to:

CO1: Master the Fundamental Concepts of Web Development with HTML, CSS, and Media Elements

CO2: Design and Develop Interactive Web Pages Using Bootstrap and JavaScript

CO3:Utilize Advanced JavaScript Features and Techniques for Efficient Coding

CO4:Understand and Implement React.js for Modern Web Development

CO5: Build Full-Stack Web Applications with Modern Tools and Frameworks

CERTIFICATION COURSE

NETWORKZ SYSTEM, NAGERCOIL

COURSE CODE/ COURSE NAME: ARTIFICIAL INTELLIGENCE WITH PYTHON

RESOURCE PERSON: A.K. InfoPark.

CLASS:III CSE

COURSE DESCRIPTION:

Artificial Intelligence (AI) with Python involves using Python programming language to develop intelligent systems that can simulate human behavior. Python is popular in AI due to its simplicity and the powerful libraries it offers, such as TensorFlow, Keras, and PyTorch. AI applications using Python can include machine learning, natural language processing, computer vision, and robotics. Through machine learning, AI systems can learn from data and make predictions or decisions without explicit programming. Python also supports deep learning, enabling neural networks to perform complex tasks like image and speech recognition. AI with Python allows developers to build applications that can understand, interpret, and respond to real-world inputs intelligently. The language's extensive libraries simplify complex algorithms and data processing, making it accessible for both beginners and experienced developers. Python's versatility and growing ecosystem make it a key tool in advancing AI technology across industries.

COURSE OUTCOME:

After completing this course, students will be able to:

CO1: Master the Fundamentals of Python for AI Development

CO2: Apply Machine Learning Techniques for Predictive Modeling

CO3: Implement Unsupervised Learning and Dimensionality Reduction

CO4:Build and Train Deep Learning Models for Complex Tasks

CO5: Explore Real-World AI Applications and Advanced AI Techniques
